What this standard covers

This standard specifies the terms and definitions of radial permanent magnet mechanical speed regulators, stipulates symbols, classifications, structural types, naming, codes, basic parameters and technical requirements, describes corresponding test methods, stipulates inspection rules, sampling and identification, marking, packaging, transportation and storage. This standard is applicable to the YCT series and is suitable for the manufacture of speed regulators with motor power between 11kW and 5000kW and pole numbers between 2 and 8. The manufacture of derivative models of the same type of speed regulator can be used as a reference.

Document data

International classification (ICS): 21.120.

Chinese classification (CCS): J19.

Estimated length of the Chinese original: 15,169 words.
