What this standard covers

This standard specifies the model, appearance structure, installation dimensions, basic parameters and technical requirements of reducers for printing and dyeing machinery, describes the corresponding test methods, and stipulates inspection rules and markings, packaging, transportation and storage. This standard is applicable to the manufacture of two-stage reducers for printing and dyeing machinery with cylindrical helical gear transmission and worm gear transmission. The manufacture of reducers for other similar purposes can be used as a reference.

Document data

International classification (ICS): 21.120.

Chinese classification (CCS): J19.

Estimated length of the Chinese original: 14,182 words.
