What this standard covers

This standard specifies the models, parameters, operating conditions, and technical requirements of gear transmission devices for three-dimensional parking equipment. It describes the corresponding test methods and specifies inspection rules, marking, packaging, transportation, and storage. This document applies to the manufacture of drive systems for mechanical parking equipment operating under intermittent conditions. Other fields with similar application scenarios should refer to this standard.

Document data

International classification (ICS): 21.2.

Chinese classification (CCS): J17.
