### What this standard covers

This standard specifies the classification, structural type, technical requirements and material requirements of pressure regulating valves for gas pressure regulating devices, specifies the corresponding test methods, specifies the inspection rules, markings and labels, and packaging and storage. This standard applies to the manufacture of pressure regulating valves for gas pressure regulating devices with nominal size DN25~DN400 and nominal pressure PN2.5~PN160 (or nominal size NPS1~NPS16 and nominal pressure Class150~Class900), working medium is natural gas and other non-corrosive gases, and the working temperature range is -46°C~60°.

### Document data

International classification (ICS): 23.060.99.

Chinese classification (CCS): J16.

Estimated length of the Chinese original: 19,119 words.
