What this standard covers

This standard specifies the technical requirements for resins for toner, describes the corresponding test methods, and specifies the inspection rules, marking, packaging, transportation and storage. This standard applies to the manufacture of resins for toners made by polymerization of styrene acrylates with other monomers or other resins, or by condensation of alkyds. This standard does not apply to styrene acrylic resins for toners made by suspension polymerization.

Document data

International classification (ICS): 37.100.20.

Chinese classification (CCS): G31.

Estimated length of the Chinese original: 13,179 words.
