What this standard covers

This standard specifies the type, basic parameters and technical requirements of continuous extension belt conveyors, the corresponding test methods, and the inspection rules, marking, packaging, transportation and storage. This standard applies to the manufacture of continuous extension belt conveyors for conveying slag in tunnel (hole) engineering. This standard does not apply to continuous extension belt conveyors used in explosive environments.

Document data

International classification (ICS): 53.040.10.

Chinese classification (CCS): J81.

Estimated length of the Chinese original: 15,159 words.
