### What this standard covers

This standard specifies the classification, model, basic parameters and technical requirements of vortex nozzles for wet dust removal of converters, describes the corresponding test methods, and specifies the inspection rules, marking, packaging and storage. This standard applies to the manufacture of vortex nozzles with a rated pressure of 0.3MPa~1MPa and a rated flow range of 10m<sup>3</sup>/h~200m<sup>3</sup>/h in the primary wet dust removal system of converters.

### Document data

International classification (ICS): 23.100.99.

Chinese classification (CCS): J70.

Estimated length of the Chinese original: 12,182 words.
