

ICS 23.160
CCS J 78

JB

**INDUSTRY STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

JB/T 14960-2025

**Minimum allowable values of the energy efficiency and energy
efficiency grades for vacuum drying equipment systems
(English Translation)**

Issued on: July 2, 2025

Implemented on: February 1, 2026

Issued by: Ministry of Industry and Information Technology

What this standard covers

This standard specifies the energy efficiency grades, energy efficiency limits, and energy efficiency calculation methods for vacuum drying equipment systems. This standard is applicable to the determination of energy efficiency and energy efficiency grade classification of intermittent and continuous vacuum drying equipment systems (including oven-type vacuum drying equipment systems, rake-type vacuum drying equipment systems, double-cone vacuum drying equipment systems, disc-type vacuum drying equipment systems, paddle-type vacuum drying equipment systems, and belt-type vacuum drying equipment systems) with an absolute pressure $\geq 85000\text{Pa}$ and using steam as a heat source.

Document data

International classification (ICS): 23.160.

Chinese classification (CCS): J78.

Estimated length of the Chinese original: 10,198 words.
