What this standard covers

This standard specifies the general requirements for the laser powder bed melting process for additive manufacturing of nickel-based superalloy materials, establishes the process flow, describes the corresponding quality inspection methods, and specifies requirements for the delivery of technical documentation. This document applies to the process activities of laser powder bed melting for additive manufacturing of nickel-based superalloy materials.

Document data

International classification (ICS): 25.03.

Chinese classification (CCS): J60.

Estimated length of the Chinese original: 14,129 words.
