What this standard covers

This standard specifies the types, basic parameters, and technical requirements of mining-use movable belt conveyors. It describes the final assembly test and specifies the inspection rules, marking, packaging, transportation, and storage. This document applies to the manufacture of belt conveyors with a conveying capacity of 2000 t/h to 20000 t/h used in open-pit mines or spoil heaps for transporting bulk materials such as lumps and granules, requiring movable transport according to process requirements.

Document data

International classification (ICS): 73.100.99.

Chinese classification (CCS): D99.
