1 Foreword

JB/T 15184-2025 was issued by Ministry of Industry and Information Technology on 19 August 2025 and has been in force since 1 March 2026.

The JB/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the technical requirements and test conditions for the abrasion resistance test of precision roller chains and sleeve chains, describes the corresponding test methods, and stipulates the test equipment and its operating conditions. This standard applies to the determination of the abrasion resistance of short-pitch precision roller chains (including heavy-duty series) and sleeve chains manufactured according to GB/T 1243.

JB/T 15184-2025 falls under ICS 21.220.30, in the field of mechanical systems and components.

This catalogue holds 260 other JB/T standards in that field.

In this catalogue, JB/T standards carry edition years from 1967 to 2026.

3 About this standard

Sector: Mechanical & Machinery Industry Standard (Recommended)

Issued by: Ministry of Industry and Information Technology

English translation: about 15 pages (approximate)

4 Related standards

Standards on related subjects:

GB/T 13487-2017 - Synchronous belts for general drive

JB/T 10970-2010 - Test rules for chain press-out force

GB/T 14212-2010 - Motorcycle chains - Characteristics and test methods

JB/T 15185-2025 - Bucket Lift Chain and Sprockets

JB/T 12328-2015 - Drag chains, attachments and sprockets for sludge conveyors

JB/T 12385-2015 - Elastomer attachment plate chains and sprockets

5 Classification and status

International classification (ICS): 21.220.30

Chinese Standard Classification (CCS): J 18

Prefix JB/T: recommended standard.
