What this standard covers

This standard specifies the structural type, technical requirements, and material requirements for valves used in high-temperature wear-resistant oil slurry pumps for refining and chemical processing, describes the corresponding test methods, and specifies inspection rules, marking, protection, and packaging. This standard applies to nominal sizes DN100?DN600 and nominal pressures PN25?PN100 or nominal sizes NPS4?NPS24. This standard specifies the ordering requirements, manufacturing process, and technical requirements for cast steel turbine cylinder parts, describes the corresponding test methods, and specifies inspection rules, quality certificates, marking, protection, packaging, and transportation. This standard applies to the manufacture of cast steel cylinder parts for turbines of 300MW and above.

Document data

International classification (ICS): 23.060.99.

Chinese classification (CCS): J16.
