What this standard covers

This standard specifies the designation, structural type, technical requirements, and material requirements of axial flow regulating valves, describes the corresponding test methods, and specifies inspection rules, marking, labeling, packaging, and storage and transportation. This standard applies to nominal sizes of DN50 to DN1000 and nominal pressures of PN16 to PN400 or nominal sizes of NPS2 to NPS40. This standard specifies the manufacturing of flange-connected axial flow control valves with nominal pressure Class 150°Class 2500, working medium such as natural gas, actuator pneumatic or electric, and flange connection.

Document data

International classification (ICS): 23.060.99.

Chinese classification (CCS): J16.

Estimated length of the Chinese original: 17,160 words.
