Foreword

JB/T 15289-2026 is a recommended industry standard of the People's Republic of China in the Machinery sector, approved and issued by the Ministry of Industry and Information Technology on 13 February 2026, with effect from 1 September 2026.

It is administered by the National Technical Committee for Compressor Standardization (SAC/TC 145).

Classification: ICS 23.140; CCS J72.

1 Scope

JB/T 15289-2026 covers integrated compressed air equipment for standard applications, that is, a compressed air unit supplied as one assembled package for general industrial use. It sets out the requirements for this equipment as a product, so that suppliers and users share the same description of what such a unit comprises.

Compressor manufacturers, packagers of air systems, factory engineers and buyers can use it when designing, ordering or accepting these units, and inspection bodies can use it as a basis for checking them. The standard is voluntary, as shown by the /T in its code. It was issued by the Ministry of Industry and Information Technology on 13 February 2026 and takes effect on 1 September 2026. It is a new standard.
