1 Foreword

JB/T 15369-2025 was issued by Ministry of Industry and Information Technology on 17 December 2025 and has been in force since 1 July 2026.

The JB/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the composition, basic parameters, and technical requirements of wind turbine blade metering and proportioning adhesive coating equipment, describes the corresponding test methods, and specifies inspection rules, marking, packaging, transportation, and storage. This standard applies to the manufacture of wind turbine blade metering and proportioning adhesive coating equipment.

JB/T 15369-2025 is filed under Chinese Standard Classification J70, in the field of machinery.

This catalogue holds 16,018 other JB/T standards without an ICS number.

In this catalogue, JB/T standards carry edition years from 1967 to 2026.

3 About this standard

Sector: Mechanical & Machinery Industry Standard (Recommended)

Issued by: Ministry of Industry and Information Technology

English translation: about 15 pages (approximate)

4 Related standards

Standards on related subjects:

GB/T 13929-2024 - Water ring vacuum pumps and compressors - Testing method

JB/T 6879-2021 - Dimensional tolerances of flow passages in castings of centrifugal pumps
