Foreword

JB/T 15418-2026 is a recommended industry standard of the People's Republic of China in the Machinery sector, approved and issued by the Ministry of Industry and Information Technology on 28 April 2026, with effect from 2 November 2026.

It is administered by the National Technical Committee for Industrial Process Measurement, Control and Automation Standardization.

Classification: ICS 17.100; CCS N11.

1 Scope

JB/T 15418-2026 is a product standard for the piston pressure vacuum gauge, a measuring instrument for pressure and vacuum in which the measurement is made with a piston. It covers the instrument as a manufactured product within the field of industrial process measurement, control and automation, and sets out the technical provisions that apply to it.

The document is of use to manufacturers of pressure and vacuum measuring instruments, to metrology and calibration laboratories that operate such gauges, and to buyers who need to specify or accept them. Its code carries the letter T, so it is a voluntary (recommended) standard and not a mandatory one. It was issued by the Ministry of Industry and Information Technology on 28 April 2026 and takes effect on 2 November 2026. It does not replace an earlier edition. The English translation of the full text lets overseas instrument makers, importers and quality staff work from the same wording as their Chinese counterparts.
