Foreword

JB/T 15484-2026 is a recommended industry standard of the People's Republic of China in the Machinery sector, approved and issued by the Ministry of Industry and Information Technology on 28 April 2026, with effect from 2 November 2026.

It is administered by the National Technical Committee for Industrial Vehicles Standardization.

Classification: ICS 56.030; CCS J83.

1 Scope

JB/T 15484-2026 is a product standard for the jib, a type of attachment fitted to fork-lift trucks. A jib attachment gives a truck a boom-like arm so that loads can be hung and lifted instead of being carried on the forks, and the document sets out the provisions that apply to this attachment.

It is intended for manufacturers of fork-lift truck attachments, truck makers who fit them, buyers, and inspection bodies that assess such equipment. The standard is voluntary, as the /T in the code indicates, and was issued by the Ministry of Industry and Information Technology under the responsibility of the National Technical Committee for Industrial Vehicles Standardization. It was issued on 28 April 2026 and is effective from 2 November 2026. It is a new standard.
