Foreword

JB/T 15485-2026 is a recommended industry standard of the People's Republic of China in the Machinery sector, approved and issued by the Ministry of Industry and Information Technology on 28 April 2026, with effect from 2 November 2026.

It is administered by the National Technical Committee for Industrial Vehicles Standardization.

Classification: ICS 53.060; CCS J83.

1 Scope

The document JB/T 15485-2026 deals with the foam rubber clamp, an attachment for fork-lift trucks. This clamp holds goods between padded arms so that the load is gripped without being damaged by hard contact, and the standard lays down the provisions for the attachment as a product.

Users include makers of fork-lift truck attachments, truck manufacturers, distributors and warehouse or factory operators who purchase such clamps, as well as testing bodies. It is a voluntary standard (code with /T). The Ministry of Industry and Information Technology issued it on 28 April 2026, and it comes into force on 2 November 2026. The technical committee in charge is the National Technical Committee for Industrial Vehicles Standardization. It is a new standard and does not replace an earlier edition.
