Foreword

JB/T 15525-2026 is a recommended industry standard of the People's Republic of China in the Machinery sector, approved and issued by the Ministry of Industry and Information Technology on 28 April 2026, with effect from 2 November 2026.

It is administered by the National Technical Committee for Abrasives and Grinding Tools Standardization.

Classification: ICS 25.100.70; CCS J43.

1 Scope

JB/T 15525-2026 is the product standard for steel wire brushes used with abrasive tools for grinding and polishing. It deals with the brushes as products made of steel wire and used to work and finish metal surfaces, and it sits within the family of abrasive products.

The document is of interest to brush and abrasive tool manufacturers, distributors, and the workshops and fabricators that buy such brushes for surface finishing, as well as laboratories that check them. It is a voluntary standard, as shown by the /T in its code. It was approved by the Ministry of Industry and Information Technology, issued on 28 April 2026 and takes effect on 2 November 2026. It is a new standard.
