Foreword

JB/T 15530-2026 is a recommended industry standard of the People's Republic of China in the Machinery sector, approved and issued by the Ministry of Industry and Information Technology on 28 April 2026, with effect from 2 November 2026.

It is administered by the National Technical Committee for Abrasives and Grinding Tools Standardization.

Classification: ICS 25.100.70; CCS J43.

1 Scope

JB/T 15530-2026 belongs to the series on special silicon carbide products and addresses recrystallized silicon carbide rollers. These are roller bars made of recrystallized silicon carbide ceramic, the kind used to carry and convey goods through high-temperature kilns and furnaces. The standard treats them as a product.

It serves producers of silicon carbide ceramics, kiln and furnace builders, and the buyers and inspection bodies that deal with such rollers. It is a voluntary standard (code with /T). The Ministry of Industry and Information Technology approved it; it was issued on 28 April 2026 and takes effect on 2 November 2026. It is a new standard.
