Foreword

JB/T 15555-2026 is a recommended industry standard of the People's Republic of China in the Machinery sector, approved and issued by the Ministry of Industry and Information Technology on 13 February 2026, with effect from 1 September 2026.

It is administered by the National Technical Committee for Refrigeration and Air Conditioning Equipment Standardization.

Classification: ICS 27.200; CCS J73.

1 Scope

JB/T 15555-2026 applies to ultra-low ambient temperature air source heat pump (water chilling) packages. These are factory-built units that use outdoor air as the heat source and are designed to keep working in very cold outdoor conditions, supplying heating and chilled water. The standard treats the package as a refrigeration and air conditioning product.

Heat pump manufacturers, system designers, building and district heating operators, buyers and testing laboratories can use it. It is a voluntary standard, as the /T in the code indicates. It was approved by the Ministry of Industry and Information Technology, issued on 13 February 2026 and takes effect on 1 September 2026. It is a new standard.
