Foreword

JB/T 15620-2026 is a recommended industry standard of the People's Republic of China in the Machinery sector, approved and issued by the Ministry of Industry and Information Technology on 1 June 2026, with effect from 1 December 2026.

It is administered by the National Technical Committee for Testing Machines Standardization.

Classification: ICS 19.100; CCS N78.

1 Scope

JB/T 15620-2026 is a product standard for portable instruments that test the corrosion resistance of coatings by an electrochemical technique. It belongs to the series on non-destructive testing instruments and deals with the hand-carried type of instrument, as distinct from fixed laboratory equipment.

The standard is used by manufacturers of testing instruments, by laboratories and inspection bodies that operate such instruments, and by buyers who need a common basis for specifying and accepting them. It is voluntary, as the /T in the code shows. It was approved by the Ministry of Industry and Information Technology, issued on 1 June 2026 and takes effect on 1 December 2026. It is a new standard.
