1 Scope

This standard specifies the pharmaceutical blister packaging machine (hereinafter referred to as "packaging machine") classification and marking, requirements, test methods, inspection rules and standards

Log, instruction manual, packaging, shipping and storage.

This standard applies to drugs, food blister packaging machine.

2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated version applies to this article

Pieces. For undated references, the latest edition (including all amendments) applies to this document.

GB/T 191 Packaging - Pictorial signs

GB 2894 safety signs and guidelines for their use

Mechanical and electrical safety - Mechanical electrical equipment - Part 1. General specifications

GB 6388 shipping package receiving and shipping mark

GB/T 9969 Industrial Product Manual General

The Generation of GB/T 10111 Random Number and Its Application in Product Quality Sampling Inspection

GB/T 13306 signs

GB/T 13384 mechanical and electrical product packaging General technical conditions

Metallic cutting machines - Measurement of noise level of sound pressure level GB/T 16769

Safety of machinery - Accidental lubricant contact with the product - Hygienic requirements

Industrial machinery - Electrical equipment - Protective earthing continuity test code GB/T YBB00152002-2015 medicinal aluminum foil

Polyvinyl chloride solid medical hard tablets

YBB00242002-2015 polyamide/aluminum/PVC cold stamping solid pharmaceutical composite hard film

3.1 classification

Packaging machine in accordance with its structure is divided into roller, flat and rolling plate.

3.2.1 model preparation

DP Function code. Blister packaging machine

Feature Code. Roller (T), Flat (P) and Roller (H)

Specifications Code. The maximum width of packaging materials used, in millimeters (mm)
