1 Scope

This standard specifies the classification and labeling of extraction tank, requirements, test methods, inspection rules and signs, instruction manual, packaging, transportation and Storage.

This standard applies to atmospheric pressure, negative pressure and positive pressure extraction of solid material in the extraction of effective components of the tank.

2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated version applies to this article

Pieces. For undated references, the latest edition (including all amendments) applies to this document.

GB 150-2011 (all parts) pressure vessels

GB/T 151-2014 heat exchanger

GB/T 191 Packaging - Pictorial signs

Electrical apparatus for explosive gas atmospheres - Part 1. General requirements for equipment

GB/T 4272 equipment and pipe insulation technology

Mechanical and electrical safety - Mechanical electrical equipment - Part 1. General specifications

GB/T 6388 transport packaging shipping symbols

GB/T 9969 Industrial Products Manual General

The Generation of GB/T 10111 Random Number and Its Application in Product Quality

Sampling Inspection

GB/T 13306 signs

Industrial machinery - Electrical equipment - Protective earthing continuity test code GB/T
JB/T 4711 Pressure Vessel Coating and Transport Packaging

Steel welded pressure vessels

TSG21-2016 Fixed Pressure Vessel Safety Technology Supervision Procedures

Pharmacopoeia of the People's Republic of China (2000 edition)

3.1 classification

Extraction tank according to the structural characteristics of static extraction and dynamic extraction.

Extraction tank can be divided into atmospheric pressure, negative pressure (F) and positive pressure (Y).

3.2.1 model preparation

Model preparation according to the provisions of YY/T 0216-1995.
