What this standard covers

This standard specifies the types, basic parameters and technical requirements of electric suspension cranes, specifies the corresponding test methods, specifies the inspection rules and marking, packaging, transportation and storage. This standard applies to the manufacture of general-purpose electric suspension cranes that work in general environments and use electric hoists as lifting mechanisms. This standard does not apply to electric suspension cranes that work in explosive, nuclear radiation or corrosive gas environments.

Document data

International classification (ICS): 53.020.20.
