What this standard covers

This standard specifies the test principle for the high-temperature heat deformation of investment casting shells, specifies the test instruments and equipment and sample preparation, describes the test methods, and specifies the test data processing and test report. This document applies to the radial heat deformation value testing of investment casting shells from room temperature to 1600°C.

Document data

International classification (ICS): 71.040.50.

Chinese classification (CCS): J31.

Supersedes the earlier edition JB/T 2980.1-1999.
