What this standard covers

This standard specifies a method for determining the bulk density of superhard abrasives. This standard applies to the determination of the bulk density of synthetic diamond and cubic boron nitride with a particle size of 16/18 to 400/500.

Document data

International classification (ICS): 25.100.70.

Chinese classification (CCS): J43.

Supersedes the earlier edition JB/T 3584-2012.
