What this standard covers

This standard specifies the classification of push-button switches for machine tools, and stipulates technical characteristics, normal use, installation, transportation conditions, structure, and performance requirements, and describes the corresponding test methods. This standard applies to the manufacture of push-button switches used for control, signaling, and interlocking purposes in AC circuits with a rated voltage up to 690V and DC rated operating voltage up to 440V.

Document data

International classification (ICS): 29.120.40.

Chinese classification (CCS): K31.

Supersedes the earlier edition JB/T 3907-2008.
