3 Quality indicators
4 Test methods
5 Inspection rules
Annex A Method for the determination of lubricating oil consumption of medium-speed diesel engines (normative)

1 Scope

This standard specifies the quality grading indicators, test methods and inspection rules for small and medium power diesel engines. It applies to the inspection and assessment of the quality grade of small and medium power diesel engine products.

2 Normative references

The provisions contained in the following standards become provisions of this standard through reference in this standard. The editions shown were valid at the time of publication of this standard. All standards are subject to revision, and the parties using this standard should consider the possibility of applying the latest editions of the standards listed below.
