What this standard covers

This standard specifies the main parameter series and technical requirements for lever-type force standard machines, describes the corresponding testing methods, and specifies requirements for inspection rules, marking, packaging, and accompanying documents. This standard applies to the manufacture of single-lever type lever-type force standard machines; other structural types of lever-type force standard machines should refer to this standard for manufacturing.

Document data

International classification (ICS): 19.06.

Chinese classification (CCS): N74.

Supersedes the earlier edition JB/T 5484-2010.
