What this standard covers

This standard specifies the material selection, basic type, marking, technical requirements, and working conditions of water-lubricated thermosetting plastic bearings. It describes the corresponding test methods and specifies inspection rules, packaging, marking, transportation, and storage. This standard applies to the manufacture of thermosetting plastic bearings that use water as the lubricating medium.

Document data

International classification (ICS): 21.100.10.

Chinese classification (CCS): J12.

Supersedes the earlier edition JB/T 5985-1992.
