What this standard covers

This standard specifies the type, basic parameters, and technical requirements of electromagnetic separation rollers, describes the corresponding test methods, and specifies inspection rules, marking, packaging, transportation, and storage. This standard applies to the manufacture of electromagnetic separation rollers. This standard does not apply to electrically heated aluminum alloy melting furnaces or machine-side holding furnaces.

Document data

International classification (ICS): 25.120.30.

Chinese classification (CCS): J61.

Supersedes the earlier edition JB/T 6101-2011.
