What this standard covers

This standard specifies the terms and definitions of oil delivery gear pumps, specifies the types and models and technical requirements, specifies the corresponding test methods, specifies the inspection rules and complete sets, marking, packaging, transportation and storage. This standard applies to the manufacture of pumps for conveying oil products that do not contain solid particles and fibers or liquids with similar properties to oil products (including magnetic drive pumps that can convey liquids that do not contain magnetic substances, flammable, explosive, volatile, toxic and precious).

Document data

International classification (ICS): 23.080.
