What this standard covers

This standard specifies the basic parameters and technical requirements of resistance strain gauge accelerometers, describes the corresponding test methods, and specifies inspection rules, marking, packaging, transportation, and storage requirements. This standard applies to the manufacture of sensors that measure the acceleration of objects using resistance strain gauges as the sensitive element.

Document data

International classification (ICS): 17.160.

Chinese classification (CCS): N13.

Supersedes the earlier edition JB/T 6825-1993.
