1 Scope

This standard specifies the technical requirements, test methods, inspection rules, quality certificate and marking of carbon and low-alloy steel disk and wheel forgings for steam turbine (25MW and lower).

This standard is applicable to the ordering, manufacturing and acceptance of disk and

wheel forgings for steam turbine (25MW and lower).

2 Normative References

The following normative documents contain provisions which, through reference in this text, constitute provisions of this standard. For dated references, subsequent amendments to (excluding amending errors in the text), or revisions of, any of these publications do not apply. However, all parties coming to an agreement according to this standard are encouraged to study whether the latest edition of the normative document is applicable. For undated references, the latest edition of the normative document applies.
