What this standard covers

This standard specifies the specifications, codes, models, basic parameters, external dimensions, and technical requirements of continuously variable cycloidal pinwheel reducers. It describes the corresponding test methods and specifies inspection rules, sampling, judgment, marking, packaging, transportation, and storage. This standard applies to the manufacture of continuously variable cycloidal pinwheel reducers with a speed ratio of 5°C10, power of 0.18 kW to 15 kW, and an operating ambient temperature of -10°C to 40°.

Document data

International classification (ICS): 21.12.

Chinese classification (CCS): J19.

Supersedes the earlier edition JB/T 7254-1994.
