What this standard covers

This standard specifies the technical requirements for centrifugal blowers used in sintering plants, describes the corresponding test methods, and specifies the test rules, marking, packaging, and storage. This document applies to the manufacture of centrifugal blowers for exhausting sintering flue gas in sintering processes under standard conditions, with an inlet temperature not exceeding 250°C, a pressure rise not exceeding 0.03MPa, and a dust content in the medium not exceeding 100mg/Nm³. It is also applicable to blowers with welded steel plate structures used for dust removal, cooling, cement, thermal circulation, desulfurization, power plant boiler blowing, and induced draft applications.

Document data

International classification (ICS): 23.12.

Chinese classification (CCS): J72.

Supersedes the earlier edition JB/T 7259-2006.
