What this standard covers

This standard specifies the classification, grades, and technical requirements of self-hardening furan resins for casting, describes the corresponding test methods, and specifies inspection rules, labeling, packaging, and storage requirements. This standard applies to the manufacture of acid-catalyzed self-hardening core sand binders for casting, synthesized using furfuryl alcohol as the main raw material, combined with formaldehyde, urea, and/or phenol.

Document data

International classification (ICS): 71.100.99.

Chinese classification (CCS): J31.

Supersedes the earlier edition JB/T 7526-2008.
