1 Scope

This standard specifies the classification, technical requirements and testing methods of wire type IQI (monofilament IQI) for industrial radiographic testing.

This standard is applicable to wire type IQI made of copper, steel, titanium, aluminum and other metals, the type inspection and delivery inspection for wire type IQI as well as the acceptance basis used for subscribers' orders. Appendix A specifies a special wire type IQI.

2 Normative References

The following documents for the application of this standard are essential. For dated reference, only the dated edition applies. For undated references, the latest edition (including any amendments) is applicable to this standard.

GB/T 12604.2 Non-destructive Testing - Terminologies Used in Radiographic Testing

GB/T 19001 Quality Management Systems - Requirements

GB/T 27025 General Requirements for the Competence of Testing and Calibration Laboratories

3 Terminology and Definition

For the purpose of this document, the terminologies and definitions defined in GB/T 12604.2 apply.
