What this standard covers

This standard specifies the analytical methods for the main chemical components in cubic boron nitride. This document applies to the analytical activities for the chemical components in cubic boron nitride, including boron nitride, silicon dioxide, ferric oxide, aluminum oxide, calcium oxide, magnesium oxide, anions, and surface impurity elements.

Document data

International classification (ICS): 25.100.70.

Chinese classification (CCS): J43.

Estimated length of the Chinese original: 25,262 words.

Supersedes the earlier edition JB/T 7994-2012.
