What this standard covers

This standard specifies the classification of electronic counters in counting relays, specifies characteristics, relevant product information, normal use, installation and transportation conditions, structural and performance requirements, and inspection rules, and describes the corresponding test methods. This standard applies to the manufacture of electronic counters (including electronic counting relays) used for counting and counting control in control circuits with AC 50Hz (or 60Hz) and a rated control power supply voltage up to 380V or DC a rated control power supply voltage up to 220V.

Document data

International classification (ICS): 29.120.70.

Chinese classification (CCS): K33.

Supersedes the earlier edition JB/T 8794-2010.
