What this standard covers

This standard also specifies the model, basic parameters, type, dimensions, and technical requirements of manual grease pumps (2.5MPa) for grease filling. It describes the corresponding test methods and specifies inspection rules, marking, packaging, transportation, and storage. This document applies to the manufacture of manual grease pumps that supply grease with a cone penetration of 265°C385 (25°, 150g) 1/10mm and a nominal pressure of 2.5MPa to the grease reservoir of a lubrication pump.

Document data

International classification (ICS): 21.26.

Chinese classification (CCS): J21.

Supersedes the earlier edition JB/T 8811.2-1998.
