What this standard covers

This standard specifies the technical requirements for spherical roller bearings and eccentric sleeves, describes the corresponding test methods, and specifies inspection rules, marking, and rust-proof packaging requirements. This standard applies to the manufacture of metric and imperial spherical roller bearings and eccentric sleeves with dimensions conforming to GB/T 3882-2017.

Document data

International classification (ICS): 21.100.10.

Chinese classification (CCS): J11.

Supersedes the earlier edition JB/T 8919-2010.
