What this standard covers

This standard specifies the working mode, classification, and technical requirements of one-way wedge overrunning clutches, describes the corresponding test methods, and specifies inspection rules, installation and lubrication, marking, packaging, transportation, and storage. This standard applies to the manufacture of one-way wedge type (contact or non-contact) overrunning clutches that transmit nominal torque of 10N μ m to 25000N μ m and have an operating ambient temperature of -40°C to +70°.

Document data

International classification (ICS): 21.120.20.

Chinese classification (CCS): J19.

Supersedes the earlier edition JB/T 9130-2002.
