What this standard covers

This standard specifies the requirements for geometric accuracy, positioning accuracy, repeatability, and working accuracy of horizontal precision boring machine heads. It describes the corresponding testing methods and specifies the inspection items. This standard applies to the accuracy inspection activities of ordinary and precision horizontal precision boring machine heads with front bearing diameters of 40 mm to 120 mm.

Document data

International classification (ICS): 25.060.10.

Chinese classification (CCS): J52.

Supersedes the earlier edition JB/T 9900.1-1999.
