What this standard covers

This standard specifies chemical analysis methods for the main components of silicate rocks and minerals and siliceous raw materials. This standard is applicable to the analysis of the composition of common silicate rocks and minerals, clayey raw materials, siliceous raw materials and other rocks and minerals with similar compositions.

Document data

International classification (ICS): 71.040.40.

Chinese classification (CCS): Q64.

Estimated length of the Chinese original: 80,872 words.
