What this standard covers

This standard specifies the technical requirements, test methods, inspection rules, marking, packaging, transportation, and storage of unsaturated polyester resins used for mechanical molding of fiber-reinforced plastics. This document applies to unsaturated polyester resins with styrene as the main crosslinking monomer, used in winding, molding, pultrusion, and continuous sheet processes.

Document data

International classification (ICS): 83.120.

Chinese classification (CCS): Q21.

Supersedes the earlier edition JC/T 1092-2008.
