1 Foreword

JC/T 2110-2012 was issued by Ministry of Industry and Information Technology on 28 December 2012.

The JC/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 8 pages in English translation.

2 Scope Preview

This standard specifies the construction of indoor air ion concentration of the test method principle, General, test procedures, calculated results and test reports. This standard applies to all types of building indoor air ion concentration tested.

JC/T 2110-2012 falls under ICS 91.100.01, in the field of construction materials and building.

This catalogue holds 579 other JC/T standards in that field.

In this catalogue, JC/T standards carry edition years from 1973 to 2026.

3 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document.

JC/T 1016-2006 - Testing on negative in concentration of materials

4 About this standard

Issued by: Ministry of Industry and Information Technology

English translation: about 8 pages (approximate)

5 Related standards

Standards on related subjects:

GB/T 23263-2024 - Determination of asbestos in products

JC/T 2625-2021 - Titanium gypsum

GB/T 28628-2012 - Test method for air ion concentration of materials

JC/T 2911-2025 - Acetone extract determination method for friction powder

JC/T 2005-2021 - Natural mineral fiber for friction material

JC/T 2004-2021 - Metal fiber for friction material

6 Classification and status

International classification (ICS): 91.100.01

Chinese Standard Classification (CCS): Q 61

Prefix JC/T: recommended standard.
