1 Foreword

JC/T 2133-2012 was issued by Ministry of Industry and Information Technology on 28 December 2012.

The JC/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 8 pages in English translation.

2 Scope Preview

This standard specifies the use of inductively coupled plasma atomic (ICP-AES) determination of the emission spectrum of the semiconductor polishing slurry method using silica content of impurity elements.

JC/T 2133-2012 falls under ICS 71.040, in the field of chemical technology.

This catalogue holds 12 other JC/T standards in that field.

In this catalogue, JC/T standards carry edition years from 1973 to 2026.

3 Normative references

4 About this standard

Issued by: Ministry of Industry and Information Technology

English translation: about 8 pages (approximate)

5 Classification and status

International classification (ICS): 71.040

Chinese Standard Classification (CCS): C 14

Prefix JC/T: recommended standard.
