1 Foreword

JC/T 2335-2025 was issued by Ministry of Industry and Information Technology on 10 April 2025 and has been in force since 1 November 2025.

It replaces the earlier edition JC/T 2335-2015.

The JC/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

This standard specifies the product models, specifications, and codes, main raw materials, technical requirements, test methods, inspection rules, marking, packaging, transportation, and storage of fiberglass mesh covers. This document applies to fiberglass mesh covers made primarily of fiberglass mesh cloth, impregnated with phenolic resin, dried, cut, and hot-pressed for curing. They are mainly used as reinforcing substrates and base supports for surface polishing abrasives such as sanding discs.

JC/T 2335-2025 falls under ICS 59.100.10, in the field of textile and leather technology.

This catalogue holds 13 other JC/T standards in that field.

In this catalogue, JC/T standards carry edition years from 1973 to 2026.

3 About this standard

Issued by: Ministry of Industry and Information Technology

English translation: about 8 pages

Chinese original: about 12,185 characters

Supersedes the earlier edition JC/T 2335-2015.

4 Related standards

Other editions:

JC/T 2335-2015 (earlier edition)

Standards on related subjects:

GB/T 7690.5-2013 - Reinforcements -- Test method for yarns -- Part 5: Determination of fiber diameter for glass fiber

GB/T 7689.5-2013 - Reinforcements -- Test method for woven fabrics -- Part 5: Determination of glass fibre tensile breaking force and elongation at break

GB/T 6006.2-2013 - Test method for glass mats -- Part 2: Determination of tensile breaking force

JC/T 2819-2024 - Energy-saving Technology Guidelines for Fiberglass Manufacturers

JC/T 2847-2024 - Fiberglass mesh gypsum board

JC/T 2336-2015 - Determination of silicon, potassium, sodium, calcium, magnesium and iron content in carbon fiber

5 Classification and status

International classification (ICS): 59.100.10

Chinese Standard Classification (CCS): Q 69

Prefix JC/T: recommended standard.
